

ANTI-CHAOS THEORY

CHAOS: the measure of disorder in a system

ANTI-CHAOS: the force applied to a system which opposes chaos in equal and opposite measure (Newtonian Physics: The Laws Of Motion—"For every action there is an equal and opposite reaction")—and then the additional force applied to the system which causes permanent change in direction of the system in question (Newtonian Physics: The Laws Of Inertia—"An object tends to continue in uniform motion unless and until acted upon by an outside force").

AXIOMS:

- A. The universe is fundamentally and naturally chaotic (Chaos Theory; The Uncertainty Principle)
- B. Anti-chaos holds the universe together (God, as a Consistency Force)
- C. Chaos is the material representation of universal evil (and its desire to destroy)
- D. Chaos brings sin (anti-God), sickness, psychological disorder, and retards positive progress (in its desire to destroy)
- E. Chaos retards progress in the same way that a frictional coefficient retards sliding motion (in its fundamental element of opposition to all things good and orderly)
- G. Anti-chaos is a design: a grid, or matrix, if you will--which causes chaotic elements to become organized
 - 1) square pegs go into square holes in systems which are organized: when all are arranged and in place peace and tranquility (organization/efficiency) result
 - 2) if square pegs are forced into round holes, falsehood, quiet desperation, rationalization, and confusion are the result
 - 3) if the peg is not into the hole at all--bouncing and rebounding at random without anchor--chaos is the material representation
- H. Anti-chaos assists progress in the same way that an engine affects a rocket: it causes it to move forward despite the forces working against it
- I. Organization attempts to put the proper-shaped pegs into the proper-shaped holes: and when this is done, organization and anti-chaos is the result; an immediate feeling of relief/peace, clear vision, courage, and confidence manifest themselves

J. Courage (Knowledge and/or Experience) is anti-chaos; Fear (Lack of Knowledge and/or Experience) is chaos

K. An atom's energy, contained or held together, is anti-chaos; fission (the release of the atom's energy) results in chaos (an atomic explosion)

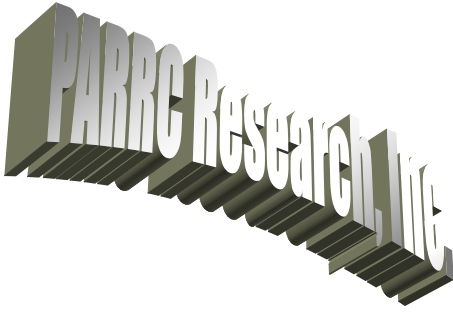

L. A team of people with clearly defined roles and leadership represent anti-chaos; a mob mentality and structure represents chaos (disorder)

Anti-chaos matrices can be assembled for any scenario which can be experienced, or is in the material world.

An example of anti-chaos: when Jesus stilled the storm by commanding "Peace--" first; then "Be still.;" two SEPARATE commands which enact two things in the cosmos. First, He called up the force which brings peace and showed it to the storm; then, he commanded peace to affect the storm. The storm, recognizing the force of peace by commandment allowed itself to conform to anti-chaos on the Words of Jesus.

From another vantage, the anti-chaos command to be at peace enables the system to become organized; the command to be still then becomes possible.

The next page has an "Anti-Chaos" Worksheet you can use to begin the process in your life:

Anti-Chaos.

A WORKSHEET FOR THE ESTABLISHMENT OF PLANS TO REDUCE CHAOS

STATEMENT OF PROBLEM/SITUATION:

WHO IS THE INJURED PARTY/THE ONE WHO WANTS THIS SHEET:

BRAINSTORM: LIST FOUR POSSIBLE SOLUTIONS TO THE PROBLEM/SITUATION:

RANK THE FOUR SOLUTIONS ON A SCALE OF ONE TO TEN:

1) _____ 2) _____ 3) _____ 4) _____

CHOOSE AND NAME YOUR FINAL SOLUTION:

ACTION PLAN TO IMPLEMENT SOLUTION: STEPS TO BE TAKEN WITH DATES:

STEP:

DATE:
